- The tDPtFS occurs 3 times with the ניא ending. Like the Piel and unlike the Qal, the two times that the tDPtFS is not a 3-נ verb (hence it has Vס), Vס does not reduce, giving ניא instead of ית.
- The tDI3fp occurs twice in the Bible, once with Vס = Tsere and once with Pathach, so ניא is also acceptable for tDI(3/2)fp. The tDI2fp and tDM2fp never occur in the Bible.
